

SAHIL JAMDAR

Java Backend Developer | Spring Boot | IAM (Ping/ForgeRock) | AWS | Kubernetes | Microservices

+91 8605505537 | jamdar.sahil26@gmail.com | linkedin.com/in/jamdarsahil | Pune, India, 411036

PROFESSIONAL SUMMARY

Java Backend Developer and **IAM Engineer** with **3+ years of enterprise experience** building and supporting scalable backend systems using **Java, Spring Boot, REST APIs, Microservices**, and **Ping Identity/ForgeRock**. Proficient in designing customized **authentication journeys**, developing **JavaScript custom nodes**, and seamlessly integrating downstream microservices. Skilled in cloud-native deployment using **AWS, Docker, Kubernetes**, and **CI/CD pipelines**. Proven track record of handling high-volume identity flows, production troubleshooting, and securing identity architectures.

TECHNICAL SKILLS

- **Programming & Backend:** Java, Spring Boot, Microservices, REST APIs, SQL (MySQL, PostgreSQL), NoSQL (DynamoDB, MongoDB), Redis, LDAP, Maven, JUnit, Mockito
- **IAM & Security:** ForgeRock/PingAM, Authentication & Authorization Journeys, OAuth 2.0, JWT, LDAP
- **Cloud & DevOps:** AWS, Docker, Kubernetes, Git, CI/CD Pipelines, Blue Green Deployments, Linux
- **API & Data Formats:** RESTful Services Integration, OpenAPI/Swagger, JSON, JOLT Transformations
- **Developer Tools:** IntelliJ IDEA, Git, Splunk, AppDynamics, SonarQube, Postman

WORK EXPERIENCE

HSBC | Senior Software Engineer | Pune, India

Dec 2022 – Present

- Designed Low-Level Designs (LLDs) and developed high-availability, enterprise-grade **Java** and **Spring Boot** microservices using Spring MVC, Spring Security, and Hibernate/JPA to build scalable systems.
- Architected scalable enterprise RESTful APIs using **Swagger** specifications, utilizing **Postman** for contract testing, environment configuration, and collection sharing to boost team collaboration.
- Streamlined Spring Boot development cycles by leveraging **AI coding** assistants, **LLMs**, and **n8n** automated workflows to accelerate unit test generation and optimize complex code refactoring.
- Engineered complex end-to-end authentication journeys and access control policies within **OpenAM** and **OpenIDM**, utilizing Page Nodes, Choice Collectors, Shared State, and Metadata Callbacks for enhanced security.
- Implemented robust **OAuth 2.0 frameworks**, **OIDC (OpenID Connect)**, **JWT validation**, token exchange, and secure session handshakes across Consumer-to-Business (**C2B**) and Business-to-Business (**B2B**) channels to ensure seamless identity verification.
- Integrated enterprise identity persistence layers, configuring **OpenIDM** managed objects alongside **LDAP** directories, Amazon **DynamoDB** for state storage, and **Redis** for distributed session caching.
- Developed custom backend extensions, JavaScript nodes, and **re-authentication** REST APIs within OpenIDM/OpenAM for business-specific verification logic, device binding, and OTP validation workflows.
- Containerized Spring Boot applications using **Docker**, managed **Kubernetes** deployments, and deployed microservices across **AWS EC2** instances and **Linux VMs** to ensure high-availability operations.
- Automated multi-environment application builds using **Maven POM** profiles, managed version control via **Git**, and supported automated **CI/CD** release pipelines to accelerate software delivery.
- Conducted static code analysis using **SonarQube**, refactoring Java codebases to remediate security vulnerabilities, upgrade runtime dependencies, and reduce technical debt to improve overall code quality.

- Executed end-to-end release management, including **Change Request** (CR) creation, CAB approvals, and smooth production deployments in strict compliance with enterprise governance standards to minimize deployment risks.
- Maintained high production application availability by proactively monitoring and resolving critical technical incidents within strict SLAs, leveraging **Splunk** log analysis, **AppDynamics** monitoring, and Kubernetes pod debugging to maximize system uptime.

EDUCATION

- Post Graduate Diploma in Advanced Computing (C-DAC)
- Bachelor of Engineering (B.E.) | University of Pune

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (2024)
- AWS Certified Developer – Associate (2025)
- Fundamentals of Agentic AI: Business Implications and Ethical Insights (2026)
